

国際経営学修士（専門職）
カリキュラム・ポリシー（教育課程の編成・実施方針）

Our mission is to develop visionary leaders who create and innovate societies. To this end, our curriculum is designed to develop leaders with the necessary skills to solve problems in a rapidly evolving business environment.

Structure

Each course falls into one of three categories: Fundamental, Applied and Specialized. After acquiring basic knowledge with Fundamental courses, and honing their skills with Applied courses, students can use these skills to tackle contemporary issues and problems in Specialized courses.

Fundamental and Applied courses are split into six disciplines. Three of these disciplines are common to any MBA program: Organizational Behavior & Human Resource Management, Marketing & Strategy, and Accounting & Finance. They allow students to systematically acquire the skills that will allow them to understand people, capital and money. In addition, GLOBIS focuses on Three additional unique disciplines: Critical & Analytical Skills, Management Philosophy, and Technovate. During tough times, leaders must rely on their values and beliefs to guide them. In addition, in today's environment of rapid change, modern leaders need a deeper understanding of technology to thrive.

Our specialized courses are split into the following areas: Creation, focusing on creating something from scratch. Innovation, focusing on the iteration and growth of existing things. Japan/Asia/Global, focusing on the development of leaders who drive creation and innovation in an Asia-centered Global economy.

How?

Classes at GLOBIS are discussion-based in order to help students put their acquired knowledge into practice and produce real results. GLOBIS uses the Case method of study, so students may think deeply about topics and develop their practical skills through repeated discussion.

GLOBIS offers a one-year Full-time program as well as a two-year Part-time program to cater to the needs of working professionals.
